

DEVANSHU KUMAR

Data Analyst | SQL | Python | Power BI | Excel

Dehradun, Uttarakhand | +91-8825148742 | devanshuk449@gmail.com

GitHub | LinkedIn | LeetCode

Summary

B.Tech graduate in Computer Science (Data Science) with hands-on experience in SQL, Python, Excel, Power BI, and machine learning. Built end-to-end analytics solutions involving data cleaning, exploratory analysis, KPI analysis, predictive modeling, customer intelligence, and interactive dashboards to translate complex datasets into actionable business insights.

Technical Skills

Programming & Analytics: Python, SQL, Pandas, NumPy, Excel

Business Intelligence & Visualization: Power BI, DAX, Matplotlib, Streamlit, KPI Analysis, Data Visualization

Machine Learning: Scikit-learn, Regression, Classification, Random Forest, XGBoost, Predictive Analytics

Data Analysis: EDA, Data Cleaning, Feature Engineering, Statistical Analysis, Hypothesis Testing

Tools: Git, Jupyter Notebook, Google Colab

Experience

IBM

Jun 2025 – Jul 2025

Data Science Intern (Remote)

- Developed an AI-powered image classification solution using TensorFlow on 8,000+ image samples, implementing data preprocessing, model training, and evaluation workflows.
- Analyzed datasets and model performance in an Agile environment, identifying patterns and optimizing machine learning workflows to support data-driven decision-making.

Khetee Regenerative Agroforestry

Jun 2023 – Jul 2023

Data Analyst Intern

- Conducted field visits across rural farming communities and collaborated with farmers and stakeholders to understand operational workflows, challenges, and sustainability practices.
- Prepared analytical reports and insight-driven summaries to support organizational decision-making.

Projects

AI-Powered Customer Retention Intelligence System

Python, XGBoost, Power BI, Pandas, Scikit-learn

- Analyzed **7,043 telecom customers** using Python, implementing data cleaning, feature engineering, SMOTE, and XGBoost to predict churn and identify high-risk customers.
- Generated customer-level churn probability, risk categories, Revenue at Risk, Estimated CLV, and Priority Scores, identifying **751 critical-risk customers (10.7%)** and **\$149K in potential revenue at risk**.
- Built a **4-page Power BI dashboard** with executive KPIs, churn-risk analysis, customer segmentation, DAX measures, dynamic filters, and retention recommendations.

Climate Change Analytics & CO₂ Forecasting

Python, Random Forest, Streamlit, Pandas, NumPy

- Analyzed **1.95M+ global emissions records** from 1970–2023 using Python to identify emission trends, high-impact drivers, and sustainability insights.
- Built a Random Forest forecasting model achieving **RMSE = 371 Gg CO₂** enabling emissions prediction and scenario analysis.
- Developed an interactive Streamlit application to visualize emissions trends, model outputs, and forecasts.

Music Store Sales Analysis

SQL, Excel

- Queried **10,000+ transaction records** using SQL joins, aggregations, and window functions to analyze customer purchase behavior.
- Identified that 3 product categories contributed to **65 percent** of total revenue, enabling targeted inventory planning.
- Automated reporting with Excel pivot tables, significantly reducing manual analysis time (**approx. 40 percent**).

Education

UPES, Dehradun

Aug 2022 – May 2026

B.Tech in Computer Science (Data Science)

CGPA: 8.07/10

Achievements

- Solved **100+ SQL problems** across LeetCode and HackerRank, covering joins, aggregations, CTEs, subqueries, window functions, and analytical queries.
- Achieved **Gold Badge on HackerRank** and **SQL Badge on LeetCode**.
